harman/kardon DVD-38

DVD Audio/Video Player

DVD-Audio playback with internal bass management will delight your ears, while your eyes will be entranced by the stunning 720p or 1080i imagery via the Simplay HD-verified HDMI output. Compatible with DVD-R/RW and DVD+R/RW as well as MP3, WMA, VCD, JPEG and Kodak® Picture CD formats. Backlit remote lets you control it all. (B&H# HADVD38).....**164.95**

harman/kardon DVD-48

DVD Audio/Video and SACD™ Player

The DVD-48 delivers a performance that satisfies audiophiles and videophiles alike. On the video side, standard DVDs are upconverted to 1080p via DCDi by Faroudja technology for the ultimate high-resolution performance. Critical listeners will revel in the fidelity of both DVD-Audio and SACD playback, along with MP3 and WMA compressed music formats. (B&H# HADVD48).....**229.95**

ONKYO DV-SP506

DVD Audio/Video and SACD™ Player

A 1080p upscaling Super Audio CD and DVD Audio/Video player, the DV-SP506 is built on a platform of superior sound quality, performance-focused video processing, and HDMI capability. The DV-SP506 draws on two proprietary Onkyo technologies—VLSC and RIHD—for audio quality and system integration. For superior audio quality, it uses three high-end Burr-Brown audio DACs and benefits from a design that suppresses harmful vibrations.

JVC**XV-BP1** Blu-ray Player

A low-profile unit, the versatile XV-BP1 plays back high definition Blu-ray discs, plus playback of the AVCHD format, the high definition format widely used for HD camcorders, including the JVC HD Everio line. It features BD Live (Profile ver. 2.0) compatibility when used with USB memory. This allows connection to the web to access firmware updates, movie trailers, updated subtitles, online shopping, chat and gaming.

- Connections include HDMI ver. 1.3 with Deep Color and x.v.Color, USB Host, LAN for BD Live, component and composite video outputs, and analog, optical and coaxial audio outputs.
- Other playable formats include JPEG, MP3, WMA, Dolby Digital, Dolby Digital Plus, Dolby True HD, DTS and DTS HD.
- Plays BD-ROM, BD-R/RE, BD/DVD Hybrid, DVD-Video, DVD-R/RW, DVD+R/RW, Audio CD & CD-R/RW.

XV-BP1 (B&H# JXVBP1)**299.95****Panasonic****DMP-B15** Portable Blu-ray Disc Player

The DMP-B15 is designed to provide the ultimate high definition Blu-ray experience for those on the go. It features a high quality 8.9" WSVGA LCD screen and includes the unique VIERA CAST™ internet accessibility and BD Live functionality. The DMP-B15 provides all the technology found in its stand alone brethren, the DMP-BD60, DMP-BD80 and the VHS-Blu-ray dual player DMP-BD70V. Image quality is of the highest level, thanks to PHL Reference Chroma Processor Plus technology developed in collaboration with Panasonic Hollywood Laboratory.

**DMP-B15** (B&H# PADMPB15)**CALL****DMP-BD60 • DMP-BD80 • DMP-BD70V** Blu-ray Disc Players

Panasonic's DMP-BD60, DMP-BD80 and DMP-BD70V Blu-ray Disc players feature Full-HD Playback and an HD Audio Decoder bringing movies in all their original quality right into your living room. They are also equipped with an enhanced networking functions and host of conveniences. The DMP-BD80 steps-up with 7.1 channel analog output to produce true 7.1 surround sound, offering users a home theater environment that rivals the movie theater. The DMP-BD80 also includes a playback information window that can be used to display detailed image information while a movie is playing. The DMP-BD70V is the world's first dual deck VHS-Blu-ray player, offering multi-format playback of VHS, CD, DVD and 1080p high definition Blu-ray Discs.

- Each employs the PHL Reference Chroma Processor Plus to reproduce clear, vivid colors that are faithful to the original film.
- High definition audio decoder (Dolby Digital Plus, Dolby TrueHD, and DTS-HD Master Audio Essential) takes advantage of Blu-ray's exceptionally high quality 7.1 channel surround sound.
- VIERA Link allows users to operate audio/video components, via HDMI, with one remote.
- An internet enabled technology, VIERA CAST lets users access the web without an external box or a PC, providing access to Amazon's VOD extensive library of streamed titles, YouTube, Google's Picasa Web Album, Bloomberg and a weather channel.
- They include an SD Memory card slot and USB slot, making it easy to view and share both digital still images and HD video recorded with an HD camcorder in the AVCHD format.
- They up-convert content recorded in the 480i/p or 720p format to 1080p. They also provide 1080/24p output, thereby reproducing cinema images from a Blu-ray Disc and DVD in their original 24p form with no need for conversion.
- 96kHz surround re-master function enhances the sound quality of CDs and other sources, and even improves the quality of the multi-channel audio data on Blu-ray Discs and DVDs.

ONKYO®

TX-SR307 5.1-Channel A/V Surround Home Theater Receiver

Optimizer technology enhances those compressed audio files so they will sound far better. For even more versatility, there are four gaming modes (Rock, Sports, Action, or Role Playing Game) that allow you to customize the audio to your chosen game type.

- DTS, DTS Neo:6 5.1, DTS 96/24, Dolby Digital, Dolby Pro Logic II
- HDTV-capable (720p/1080i) component video switching (2 input/1 output)
- Theater-dimensional Virtual Surround Function
- Double Bass Function
- 3 Digital Inputs (2 Optical and 1 Coaxial)
- Speaker A/B Drive and Subwoofer Pre out

- Uses Audyssey 2EQ to correct room acoustic problems and to calibrate speakers.
- Audyssey Dynamic Volume lets you set the volume level that you want and keep it there, without having to constantly adjust it.
- Audyssey Dynamic EQ continuously adjusts frequency response and surround levels to produce the ideal balance for a given volume level.

TX-SR507 5.1-Channel A/V Surround Home Theater Receiver

The TX-SR507 steps up with four HDMI 1.3a inputs which enables you to enjoy the pristine "lossless" audio of Dolby® TrueHD and DTS-HD Master Audio, as well as secondary audio on Blu-ray Disc via Faroudja DCDi Express. HDMI 1.3a also enables CEC (Consumer Electronics Control) and offers greater bandwidth to deal with higher resolutions, 36-bit Deep Color, and high frame rates. The TX-SR507 also handles two "lossy" audio formats: Dolby® Digital Plus designed to accompany high-definition video delivered via disc media, broadcasts, and online content, and DTS-HD High Resolution Audio which offers a greater bit rate, a higher sampling rate, and more channels than the core DTS technology.

- Proprietary universal port lets you connect Onkyo's HD Radio Tuner or Dock for the iPod.

- HDTV-capable HDMI video switching
- Playback of different audio sources in two different zones

TX-SR607 7.2-Channel A/V Surround Home Theater Receiver

The TX-SR607 steps up with HDMI 1.3a inputs for six high-definition video and audio sources. Lower-resolution analog video signals can also be upscaled to 1080i and fine-tuned by Faroudja DCDi Edge. Also incorporates Dolby® Pro Logic® IIz decoding which enhances the spatial sensation of music, movies, and video games by letting you incorporate front height channels. The TX-SR607 packs an array of convenient connectivity options, allowing you to incorporate HD Radio, iPod® and MP3 players, SIRIUS™ Satellite Radio, and more.

Receivers

Pioneer VSX-519V • VSX-819H • VSX-919AH • VSX-1019AH

Home Theater Receivers

Pioneer's A/V receivers enhance compressed audio and lower-quality music files to ensure a dynamic surround listening experience. High definition fans will appreciate dynamic picture and sound reproduction capabilities including HDMI repeaters that provide full video format capabilities such as Deep Color, x.v.Color that deliver a wider gamut of hues and shades as well as Lip Sync function for synchronized audio and video playback.

**VSX-519V-K (110w x 5 channels):**

- iPhone and iPod certified for enhanced compatibility, it features two HDMI inputs, front mini input for portable audio players and dual zone audio output.
- Incorporates Advanced Sound Retriever (ASR) to greatly enhance sound reproduction of portable MP3 players by restoring the critical audio data that is often removed from a compressed audio file. When played back on a home theater system, audiences gain robust music that is near CD quality.

- Utilizes Auto Level Control (ALC) to equalize inconsistent volume levels that can fluctuate across digital audio tracks (i.e. MP3 and iPod), input sources and even TV channels and commercials to cause disruptive entertainment. By restoring the gap in recorded and playback volume without diminishing audio quality, ALC ensures consistent listening from all entertainment.

VSX-519V-K (B&H# PIVSX519VK)199.00**VSX-819V-HK (110w x 5 channels) Step-Up Features:**

- Controllable via iPod or iPhone, the VSX-819H steps-up with three HDMI inputs and a multi-format front panel USB port that can handle an array of MP3 music files. Users can seamlessly navigate and choose personalized playlists using just the receiver's remote control and a dedicated OSD.
- Supports Dolby TrueHD and DTS-HD high resolution audio formats from Blu-ray Disc feature films.

- MCACC (Multi-Channel Acoustic Calibration) takes inventory of a room's speakers then digitally optimizes each one to balance out any room-induced acoustic inaccuracies. Listeners gain extremely accurate, robust sound that reaches the ear at precisely the right time, sound level and equalization.

VSX-819V-HK (B&H# PIVSX819HK)299.00**VSX-919AH-K • VSX-1019AH-K (110w x 7 channels) with PHAT II Power Step-Up Features:**

- Proprietary Hybrid Amplifier Technology II (P.H.A.T.) ensures powerful, high quality, multi-channel sound performance at greater efficiency levels.
- The VSX-919 transcends music selection capabilities and add a touch of style to the traditional mobile device experience with full-color artwork from a selected song or album that can be displayed on a connected HDTV.
- When connected to a Blu-ray player via HDMI, the VSX-919AH uses proprietary PQLS (Precision Quartz Lock System) technology to sync the player and receiver.

VSX-919AH-K (B&H# PIVSX919AHK)399.00

- It has ASR-multi to restore compressed multichannel legacy audio, including Dolby Digital and DTS 5.1 often found on DVD movies and satellite or cable television programming. Also features ALC3e-multi, which delivers multi-channel digital audio quality even in low volume listening.

VSX-1019AH-K Only:

- Enjoy 2nd zone full-color OSD for Sirius as well as iPod album artwork
- Four HDMI inputs and Faroudja 1080p video scaler

VSX-1019AH-K (B&H# PIVSX1019AHK)499.00**SONY****STR-DH500 • STR-DH700 • STR-DH800 • STR-DN1000**

Home Theater Receivers

Designed to function as the hub of a high-definition home theater, Sony's A/V receivers offer excellent functionality and connectivity to provide a simplified approach to high-definition home theater control.

The 5.1 channel STR-DH500 offers 100 watts of power per channel and accepts 1080/60p and 24p video signals via HDMI (3 in/1 out). It also features Digital Cinema Auto Calibration and a Digital Media Port input allowing an

iPod and iPhone to be connected to the system. (B&H# SOSTRDH500)199.99

The 7.1 channel STR-DH700 steps up with 105 watts per channel, utilizes BRAVIA® Sync, and supports LPCM audio through three HDMI and three component video inputs. It supports x.v.Color, and is also S-AIR and Sirius ready. (B&H# SOSTRDH700)299.99

The sleek 7.1 channel STR-DH800 (110 watts power per channel) steps up with support for the latest advanced audio codecs. It features four HDMI and three component inputs for all high-definition needs. (B&H# SOSTRDH800)399.95

Featuring a piano black gloss design that matches perfectly with Sony's BDP-S360 and BDP-S560 Blu-ray Disc players, the flagship 7.1 channel STR-DN1000 (110 watts power per channel) steps up from the STR-DH800 with support for all the latest advanced audio codecs, including Dolby® Digital Plus, Dolby TrueHD, DTS®-HD High Resolution Audio, DTS-HD Master Audio and LPCM. Featuring four HDMI and three component inputs, it offers generous connectivity for multiple HD devices. Further, the receiver utilizes its analog connections (component, S-video and composite connection) to upscale all incoming sources to near HD quality when connected to an HDTV set. Icon-driven menu system allows for simple device and content navigation. (B&H# SOSTRDN1000)499.95

YAMAHA® HTR SERIES

High-value receivers, the HTR Series are equipped with an impressive array of features and technologies to enhance the audio/video experience. These include HDMI switching with 1080p video pass-through, Deep Color (30/36-bit) and x.v.Color pass through, iPod and Bluetooth audio compatibility, CINEMA DSP, Compressed Music Enhancer, audio delay for adjusting lip-sync, and four SCENE buttons offering easy operation (with 13 preset SCENE template).

**HTR-6230:**

- 5-channel 500W powerful surround sound (100W x 5)
- 192 kHz/24-bit DACs for all channels
- High dynamic power, low-impedance drive capability
- 1080p-compatible HDMI switching (2 in/1 out)
- iPod compatibility via optional YDS-11 Universal Dock
- Bluetooth (A2DP) compatibility with optional Yamaha YBA-10 Bluetooth Wireless Audio Receiver
- CINEMA DSP with 8 DSP programs
- Front panel mini jack input for connecting portable audio player
- Initial volume setting and maximum volume setting (B&H# YAHTR6230BL)229.95

HTR-6240 Step-up Features:

- 5-channel 525W powerful surround sound (105W x 5)
- Decoders for HD audio formats to match with Blu-ray HD Audio formats: Dolby TrueHD and DTS-HD Master Audio; Dolby Digital Plus and DTS-HD High Resolution Audio
- Burr-Brown 192 kHz/24-bit DACs for all channels
- Direct Mode for high quality sound reproduction
- 1080p-compatible HDMI (4 in/1 out)
- New SCENE buttons (BD/DVD, TV, CD and Radio) for even more simplified control
- YPAO sound optimization for automatic speaker setup
- iPod song titles displayed on the front panel
- CINEMA DSP (17 DSP programs) with adaptive DSP level
- Adaptive DRC (Dynamic Range Control) (B&H# YAHTR6240BL)329.95

HTR-6250 Step-up Features:

- 7-channel 630W powerful surround sound (90W x 7)
- Analog video upscaling to full HD 1080p
- iPod song titles displayed on the front panel and on-screen display (B&H# YAHTR6250BL)429.95

HTR-6260 Step-up Features:

- Digital ToP-ART and High Current Amplification
- Cinema DSP 3D (17 DSP programs) with adaptive DSP level
- Pure Direct
- Intelligently assignable amplifiers for Surround Back <-> Front Presence or Zone 2 connection
- XM ready with XM HD Surround powered by Neural Surround
- SIRIUS Satellite Radio ready
- Dialogue Lift
- Versatile zone control includes Zone 2 on/off and control on front panel, remote input/output and programmable dual +12v trigger outputs (B&H# YAHTR6260BL)499.95

IN-WALL AND IN-CEILING SPEAKERS

More than any other component, speakers define the sound of an audio system. In-wall and in-ceiling speakers have made tremendous strides in recent years to the point of competing with their cabinet-style counterparts. In an era of rising real estate costs, many are turning to in-wall/ceiling solutions to maximize their living space. Their clean, minimalist look and near-invisible presence, thanks to their camouflage grilles, have made them extremely popular with interior designers and decorators. When installing your next system, you may want to consider the excellent products listed below for a heard-but-not-seen experience in a home that truly emanates music.

Home Theater Speakers

Infinity TSS 3-IN-1

Three Channel, Single-Enclosure Loudspeaker

The TSS 3-in-1 will instantly and dramatically upgrade the sound of any television connected to an A/V receiver. As part of a complete home theater

system, it will deliver the left, right and center channels with all the finesse of the three separate speakers it replaces, delivering crisp dialogue and spacious imaging. Available in charcoal, the TSS 3-in-1 can be wall-mounted using its included swivel-wall-mount bracket, making it ideal for placement above or below flat-panel displays, or above a TV set or entertainment center furniture. Also includes a support cradle that enables it to be placed on a shelf.

- Rigid extruded-aluminum enclosure reduces unwanted resonances.
- Room-friendly acoustical waveguides for more accurate high-frequency response across a wider listening area
- Dual 3½" MMD woofers and 3/4" MMD tweeter for each (left, center & right) channel.
- Can be combined with Total Solutions surround speakers and a powered subwoofer to create a complete home theater loudspeaker.

Infinity Total Solutions
TSS-500 • TS-800 • TSS-1200
5.1 Home Theater Speaker Systems

Combining stunning appearance with outstanding sound quality and installation flexibility, the TSS-500, TSS-800 and TS-1200 are the perfect complement to ultra-thin flat-panel displays.

Each system includes four wall-mountable satellite speakers, a center channel speaker and a powered subwoofer. The center-channel speaker is also wall-mountable and has top and side panels with curved and contoured surfaces. The subwoofers have a rounded enclosure that fits easily into a room. The TSS-800 and TSS-1200 step-up with MMD driver technology to deliver exceptional fidelity and resolution, and extruded-aluminum satellite and center-channel enclosures.

TSS-500 (B&H# INTSS500CHR): Four two-way satellites with 2½" woofer and 3/4" tweeter, two-way center-channel with dual 2½" woofers and 3/4" tweeter, 8" 100-watt powered subwoofer. Comes with five adjustable wall-mount brackets. Charcoal finish**367.95**

TSS-800 (B&H# INTSS800CHR): Four two-way satellites with 3½" woofer and 3/4" tweeter, two-way center-channel with dual 3½" woofers and 3/4" tweeter, 10" 150-watt powered subwoofer. Includes gold-plated binding posts and 5 fixed and 5 adjustable wall-mount brackets. Charcoal finish**549.95**

TSS-1200 (B&H# INTSS1200CH): Four two-way satellites and a two-way center-channel with dual 3½" woofers and 3/4" tweeter, 12" 250-watt subwoofer. Includes gold-plated binding posts and five fixed and five adjustable wall-mount brackets. Charcoal finish**799.95**

polkaudio SurroundBar 360°

Home Theater System

A complete digital home theater audio system, the SurroundBar 360° DVD Theater includes a

single, attractive multi-channel speaker that measures 44½ x 4¾ x 4¾" (WDH) and a separate, compact console that contains an integrated DVD/CD player, SDA® signal-processing amplifier, AM/FM radio, universal remote control and a host of digital, analog, USB, and video inputs.

Add a new dimension to movies, music, TV. Connect it to any video game, satellite/cable TV box, MP3 player or other external source and experience ear-opening surround sound with just one speaker. Rediscover your favorite video games, or play DVDs, CDs, MP3 and JPEG and Kodak photo discs.

- DVD player with integrated Farouja DCDI2 upconversion with HDMI 1080i output turns any composite or S-Video signal into high-definition 480p, 720p, and 1080i video
- Magnetically-shielded, the SurroundBar360° speaker easily mounts above or below your TV. Or use the included cradle on a TV stand, a shelf or for set-top placement.
- Polk's proprietary SDA (Stereo Dimension Array) technology combines signal processing and acoustical geometry to create 360° surround from the SurroundBar 360's eight drivers.
- Patented Power Port Bass Venting System ensures that the SurroundBar 360 supplies clean, low distortion bass without the clutter of an external subwoofer.
- USB input makes it easy to attach digital photo sources and MP3 players
- Accommodates, DTS Digital Surround and Dolby Digital DVDs, as well as MPEG2, MPG, CD, CD-R/RW, DVD+R/RW, MP3 at resolutions up to 384kbps VBR (Variable Bit Rate).

polkaudio PSW111

8" Down-Firing 150-watt Subwoofer

Ideal match for the SurroundBar 360°, you can put the PSW111 practically anywhere and you won't believe the punch such a small subwoofer packs.

- LFE, line and speaker level inputs, and speaker level inputs allow easy connection to any system.
- Intelligent amplifier puts out gobs of power, but uses very little power at low volumes or standby mode.
- State-of-the-art Klippel Distortion Analyzer to help optimize the woofer's motor structure, voice coil alignment and suspension bringing you the best possible performance even at extreme listening levels.

PSW111 (B&H# POPSW111B)299.95

**Velodyne IMPACT SERIES**

Low Distortion Subwoofer

Affordable high-output, low distortion subwoofers, they feature beautiful cabinets with black gloss lacquer trim to fit in any decor, while their deep, defined bass brings movies and music to life. They include MDP amplifiers with more dynamic headroom for high impact, 2" copper-wound voice coils and an adjustable, high quality crossover system to perfectly match the subwoofer with the main speakers in the room. The Impact-10 and 12 feature a down firing port for high output and low distortion. The Impact-Mini, with a 6.5" forward-firing driving and 8" down-firing passive, produces amazing bass from a tiny cabinet. They include 3-year (electronics), 5-year (drivers) warranty.

3•2•1® GS SERIES III / 3•2•1® GSX SERIES III Home Entertainment System

Experience enhanced home theater sound from almost anything you watch—with greater simplicity than traditional five-speaker surround systems. The 3-2-1 GS Series III DVD home entertainment system delivers cinematic 2.1-channel sound with just two Gemstone speakers and a hideaway Acoustimass module. The system includes an elegant media center featuring a progressive scan DVD/CD player with 1080p video upscaling, HDMI output and AM/FM tuner.

- Patented Gemstone speaker arrays with breakthrough TrueSpace digital processing circuitry transform home entertainment into a dramatic sound experience. Easily blending into any home, the system delivers crisp, clear dialogue and dramatic sound effects—but with less complexity, fewer speakers and no wires running to the back of the room. Setup is easy (just three wires and a power cord), while a step-by-step instructional DVD walks you through the process.

- A programmable, easy-to-use universal remote control lets you command your TV and most other devices along with your DVD system.

- Otherwise the same, the 3-2-1 GSX III system steps up with the ability to easily digitally store and organize up to 200 hours of music from your CD collection. No computer is needed. Just put in a CD, press one button and music stored in the elegant media center. There's no need to create playlists. In addition, it incorporates the same uMusic intelligent playback system as in the award-winning Lifestyle 38 and 48 DVD systems. The uMusic system actually listens to your musical choices and learns your preferences, then makes selections based on what you like. No more searching for CDs or deciding which tracks to listen to. Whatever your mood, the uMusic system delivers just the songs you want to hear.

CINEMATE Home Theater System

The Bose CineMate makes it easy to enjoy the power of a home theater experience using your TV and video components, like a DVD player. There is no bulky equipment, complicated wiring or confusing installation. And there are no center or rear speakers. Just two front speakers and a hideaway Acoustimass (subwoofer) module bring movies and music to life with four quick connections. A universal infrared remote controls your system and most devices attached to your television

- Each speaker has a ported enclosure with two precisely angled drivers. Designed to deliver a multichannel presentation from just two visible speakers. The result is a home theater experience with broad, spacious soundstage and strong center imaging.
- Acoustimass module works with the small speakers to deliver the full range of sound. Produces low frequencies for all channels with no audible distortion. When the module is tucked behind a curtain or chair, all of the sound seems to come directly from the two arrays.

BOSE®**LIFESTYLE 28 SERIES III • LIFESTYLE 35 SERIES IV**Home Entertainment Systems

No matter what you want to hear—or where you want to hear it—the Lifestyle 28 Series III and Lifestyle 35 Series IV systems make it all possible with performance, elegance and simplicity. The systems are designed so every element—media center, five speakers and Acoustimass module—works in harmony, enhancing performance and ease of operation. Sound is customized to your room with the innovative ADAPTQ audio calibration system. Their stylish media center features a progressive scan DVD/CD player and AM/FM tuner.

Otherwise the same, the 28 Series III includes Direct/ Reflecting cube speaker arrays fill your room with spacious surround sound, while the 35 Series IV use Bose's tiny, award-winning Jewel Cube speaker arrays to fill your room with wondrous surround sound. The 35 Series IV also includes the Bose VS-2 Video Enhancer with 1080p upscaling and HDMI connectivity to simplify integration with other video sources (optional on the 28 Series).

- ADAPTQ® audio calibration system analyzes the way your room's dimensions and other variables affect sound, then automatically adjusts the sound of the system to the acoustics of your room.
- Acoustimass bass module works in concert with the small speakers to deliver a fuller range of theater sound and effects. The patented Bose design produces low frequencies for all channels with no audible distortion.

Lifestyle 28 Series III (#BOLS283B): Black1,999.00**Lifestyle 35 Series IV (#BOLS35B): Black2,999.00**

- 1080p video upscaling ensures your movies and sports use the highest resolution capabilities of your display. (28 Series III requires optional VS-2 Video Enhancer).

- Bose® link whole-home audio technology lets you connect and listen in as many as 14 additional rooms—even outdoors.

- Control integration enables the supplied remote to control most functions on your TV, PVR, cable box or satellite receiver.

DAV-HDX285 BRAVIA Theater Systems

Make your movies come alive with the sleek DAV-HDX285 BRAVIA theater system. It combines a 5 DVD/CD changer, 1000 watts of home theater power, and includes an iPod dock, Digital Media Port and DMPort Booster. The system is also S-AIR ready and can stream audio to additional rooms or add wireless rear speakers capability with the purchase of additional S-AIR speaker devices.

- System optimizes speaker placement in just 30 seconds with Digital Cinema Auto Calibration.
- iPod cradle enables music and video to be played from a connected device through the home theater via a Digital Media Port.
- DMPort Booster technology enhances the sound quality of all audio and video passing through the cradle accessory.
- Movie/music mode automatically detects what is being listened to and optimizes audio accordingly.

- Can upscale standard DVDs to 1080p high-definition quality via an HDMI cable when connected to an HDTV set.
- BRAVIA Sync lets you connect products with HDMI and use one button from one remote to switch right input and begin playing.
- For convenience, it includes an "Easy Set-up" disc that provides step-by-step instructions on how to set-up the main unit, wire speaker cables and calibrate all system speakers.

DAV-HDX589W (B&H# SOHDX589W)**429.95**

HT-SS360 Home Theater Systems

Designed to complement high-definition televisions and Blu-ray Disc players, the 5.1 channel HT-SS360 system combines powerful, high-quality sound with simple connectivity. It features a component A/V receiver with three HDMI inputs (one out) and 1000 watts (RMS) of power. Through these HDMI connections, it supports full HD 1080/24p and 60p video, as well as LCPM 8-channel uncompressed audio. To help simplify set up and use, the system utilizes Digital Cinema Auto Calibration and BRAVIA Sync.

- System's center console has a sleek black gloss exterior, which matches Sony's BDP-S360 and BDP-S560 Blu-ray Disc players.
- DMPort Booster technology enhances the sound quality of all audio and video passing through this connection by adding previously removed information to compressed music files.

HT-SS360 (B&H# SOHTSS360)**349.95**

- Digital Media Port allows for easy connection to portable music players like iPod and iPhone.
- One-button control with BRAVIA Sync lets you maintain the proper settings for each component, so you can focus on the entertainment.

HT-CT500 Sound Bar

The HT-CT500 packs a powerful home theater into two pieces — a sound bar and subwoofer— connected by a single wire. The 3.1-channel theater system features 400 watts (RMS) of total power and a fully functional A/V receiver built into the subwoofer. It has ample connections with three full HD 1080p HDMI inputs (one out), two component inputs and several audio inputs. Slim speaker design matches Sony's BRAVIA W5100 and XBR9 HDTVs. (A bracket is provided for attachment to the TV.) It is also S-AIR ready. Additionally, the system has an icon-based menu that can be blended over 1080p sources (connected via HDMI), allowing for simple navigation through all connected devices.

- Supports full 1080/60p and 24p video, and Deep Color and x.v.Color.
- Digital Media Port allows external audio sources to be connected.
- Analog upconversion to HDMI so you only need one HDMI cable to connect to the TV.

TV not included

- Uses Faroudjas' DCDi Cinema chip to up-scale all video to near HD quality and up-convert analog audio/video signals to HDMI.
- Icon based GUI, plus on-screen navigation and control gives you additional versatility when using digital media port.

The BDV-E300 and BDV-E500W BD home theater systems deliver full HD 1080/60p and 24p True Cinema™ output, decode the latest advanced audio codecs, and are BD-Live capable with your broadband internet connection and purchase of external memory.

The BDV-E500W features integrated S-AIR wireless audio capabilities. Sony's S-AIR technology transmits audio up to 164 feet from the main system to wireless rear speakers for simple surround sound or up to 10 individual S-AIR AirStation audio devices throughout the home. The BDV-E300 model is S-AIR ready so users can add optional modules, also sold separately.

- They support the latest advanced audio codecs including 7.1 channel Dolby TrueHD and Dolby Digital Plus, DTS-HD High Resolution Audio, and DTS-HD Master Audio decoding as well as bit-stream.
- Both systems include Sony's Digital Media Port, which adds control and connectivity options for music playback through various accessories, including a cradle for iPod players which is packaged with each system, or an optional Network Walkman™ cradle, a PC client device, and a Bluetooth adapter (each sold separately).
- They include an easy set-up DVD with step-by-step instruction on initial set up process, eliminating any confusion during the set up process. Plus, BRAVIA Sync technology simplifies every day operation with one-button command of compatible home theater components through HDMI.
- They feature Sony's Xross Media Bar (XMB) graphic user interface for easy menu navigation, Precision Drive technology and Precision Cinema Upscaling technology.
- USB port allows users to add their external flash memory for BD-Live features.

The HT-S3200 5.1-channel receiver/speaker package offers more breakthrough technology than ever before at the entry level.

With HDMI™ pass-thru for high-definition video, this is a convenient solution that allows you to enjoy Blu-ray Disc, DVD, broadcast, and gaming sources. You can

partner this package with whichever display suits your budget and achieve truly performance-driven home theater. Enjoy the benefits of tailored audio performance via a full suite of Audyssey technologies, including Audyssey EQ, Audyssey Dynamic EQ, and Audyssey Dynamic Volume. You can even integrate an iPod or MP3 player via a front-panel input, or take advantage of Onkyo's DSP modes for gaming: Rock, Sports, Action, or Role Playing Game (RPG).

- 660 Watts into 5.1 Channels (110 Watts per Channel)
- DTS®, DTS Neo:6 5.1, DTS 96/24, Dolby Digital, Dolby Pro Logic II
- 3 HDMI Inputs and 1 Output for Video
- HDMI Pass-Thru (Version 1.3 Compatible with 1080p, Deep Color™, and x.v.Color™)

- HDTV-Capable (720p/1080i) Component Video Switching (2 Inputs and 1 Output)
- 3 Digital Inputs (2 Optical and 1 Coaxial)
- 3 A/V Inputs / 1 Output
- 3 Audio Inputs / 1 Output

HT-S3200 Black (B&H# ONHTS3200)329.00**HT-S5200 7.1-Channel Home Theater System**

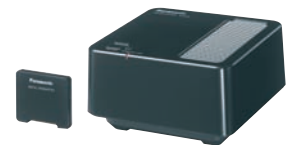

The HT-S5200 delivers reassuringly hefty amounts of power (130w per channel at 6 ohms) and all-round performance. Similar features as the HT-S3200, it adds another HDMI, coax digital, and A/V inputs, has a front panel video input for camcorders, and a dedicated port that connects the iPod via the Dock for the iPod and DSP modes specifically designed for gaming.

HT-S5200 Black (B&H# ONHTS5200B)**Silver (B&H# ONHTS5200S)499.00****Panasonic****SC-PT670 • SC-PT770****5.1-Channel DVD Home Theater in a Box Systems**

- The SC-PT670 and SC-PT770 combine outstanding sound quality with functions that are sophisticated yet easy to use. They feature a built-in Universal Dock for iPod to play audio, video and photo content stored on an iPod and displays the audio and video titles on the TV screen. The front and center speakers employ bamboo cones made of a highly rigid bamboo material to achieve an extremely pure, clear sound. The 250-watt Kelton Subwoofer, with its unique dual-chamber structure, adds a rich, powerful bass. Otherwise the same, the SC-PT770 includes the SH-FX70 Wireless Kit for Rear Speakers. Easily connect the rear speakers wirelessly without cables running from the front of the room to the back, so there is no unsightly cables to hide.
- Smart Set-up function lets user easily configure theater and other settings following simple on-screen instructions and pressing buttons on the remote control.
- Driven by powerful 1,000-watt output the combination of Bamboo Cone Speakers and Kelton Subwoofer deliver a sensational audio performance.
- They support Panasonic's VIERA Link function allowing users to operate interconnected AV devices using only the remote control of a flat-panel VIERA TV.

SC-PT670 (B&H# PASCPT670)299.95**SC-PT770 (B&H# PASCPT770)399.95****SH-FX70 Wireless Kit for Rear Speakers**

The SH-FX70 Wireless Kit is available as an optional upgrade for the SC-PT670. It provides wireless rear audio with a wireless-ready home theater using a 2.4 GHz frequency and a digital transmitter card with easy insert adaptor terminals and a compact rear receiver. It boasts a three-position switch for flexible setting [L/R Surround (5.1ch), Left Surround /Left Surround Back (7.1ch for 7.1ch systems), Right Surround/ Right Surround Back (7.1ch) and an ID Set Switch.

**SH-FX70 (B&H# PASHFX70)129.95****SC-BT200 • SC-BT300****7.1-Channel Blu-ray Home Theater Systems**

The SC-BT200 (1000 watts) and SC-BT300 (1250 watts) are 7.1 channel Blu-ray Home Theater systems with wireless ready rear speakers, integrated iPod dock and seven speakers, so you can enjoy video and audio downloaded content while enveloped in a remarkably true-to-life surround sound experience. The front and center channel speakers are made with a bamboo diaphragm which provides a tightly intertwined fiber to deliver greater rigidity and accuracy, resulting in clear reproduction of sounds over a wide frequency range, from massive explosions to metallic clangs. The subwoofer features a Kelton system with a dual diameter structure to deliver a deep powerful bass. The Smart Setup guide uses the help of GUI navigation to allow users to set up their home theater for optimum performance.

- Universal Dock for iPod, making it easy for users to play their favorite music or video downloads.
- They connect to the web for downloading bonus content available with Blu-ray Discs and for playing Internet games via BD-Live.
- Connectivity is further enhanced with the addition of VIERA Cast which integrates the Amazon Video-on-Demand (VOD) online movie rental service as well as other content options already available on VIERA Cast, including videos from YouTube, access to online photos via Picasa Web Albums, financial information from Bloomberg News, as well as local weather updates.

YAMAHA®

YSP-900 • YSP-3000 • YSP-3050 • YSP-4000

Digital Sound Projectors

Yamaha's Digital Sound Projectors offer the most convenient way to achieve multi-channel surround sound from a single unobtrusive source component. No more multiple speakers, no more clutter, no more hiding wires. The YSP-4000 features 40 beam drivers, two built-in subwoofers, 42 corresponding digital amplifiers, seven Cinema DSP programs (three movie, three music and one sports), analog to HDMI video upscaling, high definition video upscaling to 1080i, and advanced custom installation compatibility.

The YSP-900, YSP-3000 and YSP-3050 feature 21 built-in beam drivers and two built-in woofers, with 23 corresponding digital amplifiers and three Cinema DSP modes. The YSP-3000 and YSP-3050 also include a 1080p (24Hz and 60Hz) compatible HDMI interface with two inputs and one output to facilitate pure digital connections with the latest home theater components. Otherwise the same, the YSP-3050 steps up from the YSP-3000 with analog to HDMI video upscaling and high definition video upscaling to 1080i.

• IntelliBeam™ automated system calibration enables quick and easy set up each for the optimal listening experience.

- They offer full support for Dolby Digital, DTS, Dolby Pro Logic II and DTS Neo:6.
- Each features Yamaha CINEMA DSP technology to create realistic soundscapes in any room.
- Night Listening Enhancer mode allows dialog and quiet passages to be heard clearly, even at low volumes. TV Equal Volume mode prevents sudden bursts of sound from TV programs and commercials.
- SRS TruBass technology provides exceptionally deep and rich bass response, and a subwoofer output to accommodate one of Yamaha's slim design subwoofers (YST-FSW150 and YST-FSW50) for clean, rich bass reproduction.
- YSP-3000, YSP-3050 and YSP-4000 are XM Satellite Radio ready with XM HD surround sound powered by Neural Surround. They offer iPod compatibility via the optional YDS-11 dock and have an integrated FM tuner.

YST-FSW050 • YST-FSW150

Slim Line Subwoofers for the Digital Sound Projectors

Magnetically shielded, the YST-FSW050 (100w) and YST-FSW150 (130w) are slim, rack-mountable, down-firing active subwoofers that work perfectly to give the YSP systems extra low-end audio presence. The YST-FSW150 and YST-FSW050 both have minimal heights of 5 1/8" and 6 1/8", respectively, that make them ideal for rooms and installations with space limitations. They both feature Yamaha Active Servo Technology II which provides extremely stable performance and high sound pressure levels that result in natural and energetic bass reproduction and linear ports for minimizing extraneous noise.

- Active Servo Technology II ensures the highest levels of sound pressure and overall performance.
- Linear port and down-firing design complements front surround systems

SAMSUNG

HT-BD8200 Blu-ray Home Theater Sound Bar

The Samsung HT-BD8200 is the first home theater sound bar equipped with a Blu-ray player and wireless subwoofer, which delivers a streamlined, HD surround sound solution built to expand the prowess of any home theater. It features a fully integrated Blu-ray player with Full HD 1080p playback and virtual 5.1-channel surround sound for a lifelike audio presence.

As a self-contained, wall-mountable home theater sound bar, the HT-BD8200 is designed to fit in with today's contemporary décor and lifestyle. It is only 2.6 inches deep and accented with Samsung's Touch of Color™ (ToC™) design, for a classy, yet cutting-edge look. The included wireless subwoofer provides a superior blend of effective audio performance and interior design flexibility just about anywhere in the home.

The HT-BD8200 is also equipped with Samsung's "Smart Volume" technology for volume level adjustments on-the-fly for superb listening levels without the need to continually pick up the remote. It also offers seamless playback of video, photos, or music from digital devices such as media players, mobile phones, and digital cameras, using either the built-in USB port or Bluetooth™ wireless connectivity. Multimedia disc playback and an included iPod dock add even more versatility to the system's cachet. Equipped with wireless networking via an 802.11 b/g/n and optional USB dongle, the HT-BD8200 is compatible with BD-Live (Profile 2.0) interactive features and can access Netflix for instant streaming video or Pandora music.

HT-BD7200 Blu-ray Home Theater System

The Samsung HT-BD7200 2.1-channel Blu-ray home theater is ideal for consumers seeking sophisticated décor, superior performance, and comfort in their home theater solutions. Its compact design can fit into even the smallest rooms, making it more practical for deploying a full-sized multi-speaker home theater system.

The HT-BD7200 is a self-contained device that only appears diminutive. The system pumps out an impressive 400W output and simulated 5.1-channel surround sound using just two speakers. To enhance audio fidelity, it features an improved amplifier engine designed to minimize amplifier and power supply noise. The speaker unit itself is constructed from kelp, a natural material providing more audio clarity compared with conventional paper cone units. The system is also equipped with wireless networking via an optional 802.11 b/g/n USB dongle for additional convenience, and a speedy boot up time that is 2x faster than the industry standard.

The HT-BD7200 is dressed in Samsung's latest ToCTM treatment, providing a luxurious charcoal grey coating to the black bezel of the system.

HT-BD1250 Blu-ray Home Theater System

Samsung's HT-BD1250 Blu-ray Home Theater System offers consumers an affordable opportunity to discover the crisp picture and powerful

audio performance brought by Blu-ray without compromising space. Boasting 1,000 watts of output and 5.1-Channel sound,

the HT-BD1250 produces rich, life-like audio and is capable of decoding high-definition formats including, Dolby Digital Plus™, Dolby TrueHD™ and DTS-HD Master Audio®. Similar

to the HT-BD7200, the speaker cones are constructed using sea kelp rather than the traditional, chemically-treated paper pulp, for natural and improved sound reproduction. This model is also WiFi ready and features the same amplifier technology as the HT-BD7200.

Panasonic

VIERA X1 (720P)

Plasma HDTV

Representing a line of 720p plasma HDTVs, the VIERA X1 series offers stunning picture performance with a native contrast ratio of 30,000:1, an Infinite Black panel, and a new Anti-Reflective filter. A 600Hz Sub-field Drive delivers razor-sharp motion focus, providing clear, vivid images when viewing action movies or watching sports events such as tennis, baseball or football games. Extending their versatility, the VIERA Image Viewer (SD card reader) lets you display photos on a large HDTV screen with family and friends in full-HD (1920 x 1080). For convenience, VIERA Link provides control of all compatible A/V home entertainment components (Panasonic DVD recorder, Blu-ray Disc player, home theater sound system and HD camcorder) using only the TV's remote control and helpful on-screen menus. Utilizing HDMI-CEC (Consumer Electronics Control) VIERA Link even permits operation of a network camera, ideal for monitoring of a home/nursery.

TC-P50X1 (B&H# PATCP50X1): 50" Plasma TV	1099.95

VIERA S1 (1080P)

Plasma HDTV

Stepping up from the X1 series, the VIERA S1 series features Panasonic's new NeoPDP design, meaning they are the world's thinnest plasma (only 1/3" inch thick) and feature the world's highest moving resolution of 1080 lines, resulting in precise reproduction of full HD programs at any speed without loss of detail and elimination of traditional HDTV motion blur.

The S1 series are also THX certified for strict performance standards for such items as black levels, resolution, contrast, scaling, motion conversion, de-interlacing and color gamut. THX certification begins during the initial product design phase and has three primary goals — to drive quality in manufacturing, optimize image quality and signal processing, and to help simplify the consumer's buying decisions.

VIERA G10 (1080P)

Plasma HDTV

Stepping up from the S1 series, the VIERA G10 series offers the innovative internet-enabled VIERA Cast feature. VIERA Cast is a web menu that's built into the television, letting you enjoy great online entertainment like YouTube videos and your digital photos on Picasa Web Albums, all with just a click of a button—no PCs or external are required. Quick keyword input (like a cell phone) helps retrieve favorite content faster and easier.

You can also get instant weather updates from a weather channel as well as the latest financial information from Bloomberg TV, and now users have access to HD movie rental via Amazon Video-on-Demand, a streaming video service with more than 40,000 titles. Best of all, the VIERA Cast menu will self-update as soon as great new online content becomes available.

E77U SERIES

HDTV AQUOS LCD TVs

Available in 40, 46, 52 and 65", the E77U series employs a 10-bit ASV Superluculent panel and 10-bit processing engine allowing them to achieve maximum expression of the Full-HD 1080p picture, and Deep Color compatibility. The Superluculent panel applies an ultra-smooth finish that minimizes gloss while intensifying panel brightness and contrast. The result is a dramatically bright and crisp picture with reduced haze and reflectivity.

The ultimate high definition television, the E77U Series feature Sharp's Fine Motion Enhanced technology for 120Hz Frame Rate Conversion and a fast pixel response time of 4ms, ensuring viewers never miss a detail of high-definition, fast-action imagery.

- Elegant black cabinet blends into to a soft champagne gold hue that accents the bottom of the frame, befitting both modern and traditional design schemes.
- Spectral Contrast Engine XD (Extreme Dark) provides a high dynamic contrast ratio, enabling deep blacks and vibrant colors
- Special dejudder feature eliminates background motion artifacts on Blu-ray movies for smooth reproduction of film content.
- Wide 176° viewing angles enables color reproduction to appear bright and vivid from virtually anywhere in a room.

LC-40E77U (B&H# SHLC40E77U): 40" HDTV Aquos LCD TV **1099.95**

LC-46E77U (B&H# SHLC46E77U): 46" HDTV Aquos LCD TV **1799.95**

LC-65E77U (B&H# SHLC65E77U): 65" HDTV Aquos LCD TV **CALL**

- All offer two HD component (1080p compatible) video inputs, and all have four or five HDMI 1.3 terminals with Deep Color and 24p input capability for high-quality Blu-ray video processing.
- True high-definition TVs, they house a built-in ATSC and QAM tuner for access to DTV channels.
- They incorporate an RS-232C input for custom installations and a PC input so the TV serves a dual purpose as a PC monitor.
- Included table stand has swivel capability for viewing angle convenience, and can be removed for wall-mounting applications.

E67U SERIES

HDTV AQUOS LCD TVs

Available in 32- and 40" classic screen sizes, the LC-32E67U and LC-40E67U are similar to the E77U series with ASV Superluculent panel technology providing the most detailed Full HD 1080p picture possible. Although they don't offer 120Hz Frame Rate Conversion, they do include two HD component (1080p compatible) video inputs, and have 4 HDMI 1.3 terminals with Deep Color and 24p input capability. Elegant black cabinet blends into to a subtle copper hue.

The LC-32E67U also comes equipped with advanced gaming features to satisfy video gamers looking for superior picture quality. Sharp's proprietary Vyper Drive circuit reduces the lag time between the game console input and the TV display to imperceptible levels, ensuring video gamers a seamless gaming experience.

SAMSUNG

SERIES 6 • SERIES 7

1080p CCFL-backlit LCD HDTVs

Pushing the envelope in technology and design innovation, Samsung's next-generation Series 6 (120Hz) and Series 7 (240Hz) feature CCFL backlighting and improved Ultra Clear panel, a polarizer that reflects room light to produce deeper, darker black tones and bolder colors.

Both Series also feature Samsung's adaptive contrast picture setting, called "Natural" mode, which combines the brightness advantage of LCD displays and the cinema-like viewing experience of plasma displays. The result is a new level of video richness perfect for viewing films.

- 120Hz (Series 6) or 240Hz (Series 7) refresh rate works together with Samsung's proprietary Auto Motion Plus™ 120Hz or 240Hz frame interpolation technology, to eliminate motion blur and judder. Furthermore, their advanced panels have a fast pixel response time to produce razor sharp images even with fast-paced motion in action scenes.
- Aesthetically pleasing, they incorporate Samsung's ToC™ (Touch of Color) design with a luxuriously coated translucent surface over the chassis. On the Series 6, a two-tone gradation of transparent ruby color yields a much softer, glassier look for the deeper and wider curve at the bottom of the bezel.
- They feature Samsung's Internet@TV – Content Service. Powered by Yahoo! Widget Engine, users can access widget-based content from a wide array of Yahoo! Internet sources including Flickr, News, Weather and Finance. With a click of the remote, these widgets are easily accessed via a bar-style graphic user interface which sits on the bottom of the screen.
- For added flexibility, they support 802.11a/b/g/n wireless networking capabilities via a wireless USB dongle, and they DLNA-compliant, allowing viewers to easily enjoy their PC-based music, video, and pictures from any room in their home.

Series 7 Step-up Features

- Exclusive Wide Color Enhancer 3 technology maps source colors to the panel's color space. This results in exceptionally vibrant, yet natural-looking images faithful to the director's original intent.

- In addition to ToC™ design, the Series 7 also sports a transparent bar that runs across its bottom bezel.

The bar clearly divides the TV from the speaker compartment which houses a pair of down-firing speakers. It further serves to highlight the glass-like quality of the set's frame while giving the illusion that the display floats in mid-air. With a stand constructed using transparent reinforced glass, this stunning look is heightened even more.

SERIES 6 • SERIES 8

Ultra-Thin 1080p Plasma HDTVs

Combining full HD 1080p resolution, increased energy efficiency, breathtaking design, and networking options with the latest audio-visual technologies, Samsung's Series 6 and Series 8 plasmas set the standard of excellence. Measuring just over an inch in depth, the Series 8 are the world's slimmest 1080p resolution plasma sets to feature built-in ATSC tuners. Despite their slim design, they harness the latest display technology to produce unmatched picture performance and deliver the ultimate in HDTV viewing experience:

- Extremely high dynamic contrast ratio along with Ultra FilterBright technology, which uses arrays of black-coated color enhancement film to minimize glare and maximize contrast.
- Ultra Filter Bright Plus reduces the luminance in black levels by 50% over previous models for one of the darkest blacks ever seen on an HDTV.
- Exclusive Wide Color Enhancer 3 maps HD or SD signals to the panel's native color space, which covers 110% of the HD specification, helping the set portray hues in lifelike brilliance.

Sophisticated Multimedia and Networking Functions

- They are equipped to bring the best of the Web to the television. Powered by the innovative Yahoo! Widget Engine, Samsung's Internet@TV – Content Service enables users to access internet based multimedia content from their favorite Internet sources. They'll not only be able to take care of everyday tasks like tracking stocks and staying on top of headline news, but users can also browse videos, share photos and interact with friends. The suite of services ranges from a host of Yahoo! properties (Flickr, News, Weather and Finance) to third-party content from well-known names including USA Today, YouTube and eBay.
- They are wireless DLNA-compliant, allowing users to enjoy their entire library of media content that may exist in various locations around the house without the hassle of extra cabling.
- Users can also connect storage and mobile devices to the USB 2.0 port to play a variety of multimedia files via USB 2.0 Movie. An expanded list of supported codecs, which also include 3GPP, MKV, WMV9 and DivX, gives users even more freedom to easily access and share nearly all forms of digital content.

Series 6: Specially-designed, semi-transparent rose black hue lends a seductive hint of color to the TV's glass-like frame. Each of the HDTV's gracefully curved edges is transparent, creating the illusion of a display floating in mid-air. Further enhancing the design, the sets are also supported by a clear, reinforced glass stand giving it a "barely there" appearance.

PN50B650 (B&H# SAPN50B650): 50"	1799.905	PN58B650 (B&H# SAPN58B650): 58"	2899.95
----------------------------------------------	-----------------	----------------------------------------------	----------------

Series 8: Featuring a New ToC™ treated chassis, the Series 8 sports a chrome-like translucent surface, which encases the bezel. This unique treatment contrasts the TV's black bezel to enhance its ultra-slim design. Additionally, the outer edges of the bezel resemble a prism, magnifying light in such a way that its color intensity changes depending on the viewing angle.

LED HDTV

In stock now, Samsung's cutting-edge 6000 and 7000 Series use LEDs as their primary light source, rather than traditional Cold Cathode Fluorescent Lamps (CCFL). Benefits of using LEDs include ultra-high contrast ratios, slim depths that allow for more artful designs, plus increased energy savings. In addition, there are a variety of state-of-the-art networking features.

They feature high dynamic contrast ratios producing darker blacks that appear endlessly deep to the eye. Whites also remain crisp and bright with vivid colors. The Ultra Clear Panel further allows the preservation of every detail even in brightly-lit, imperfect viewing conditions. And with an adaptive "Natural" mode, they combine the brightness advantage of LCD displays with the cinema-like viewing experience of plasma displays by automatically optimizing picture settings.

SONY

V-SERIES • S-SERIES • L-SERIES

Sony's V-Series feature Sony's BRAVIA Engine™ 2 and Motionflow™ 120Hz technology for improved sharpness and detail in fast-moving images. Additionally, they offer four HDMI inputs (seven total HD inputs), BRAVIA Sync™ for simplified control of compatible devices, and a USB input for viewing digital images or listening to digital music stored on a compatible USB mass storage device. They also include Sony's LightSensor® technology and dynamic backlight control to help save energy and reduce the TV's overall carbon footprint.

The S-Series also feature 1920 x 1080 progressive video resolution along with the BRAVIA Engine 2, resulting in outstanding full HD picture quality. Each model offers three HDMI inputs, as well as single PC, component, composite and S-video inputs. They also employ Sony's LightSensor® technology and dynamic backlight control.

Available in 26- and 32-inches, the versatile BRAVIA L-series are designed for the bedroom, kitchen or office. Connectivity includes three HDMI inputs, along with single PC, component, composite and S-video inputs.

The V-, S-, and L-series models are compatible with Sony's BRAVIA Link modules, including the BRAVIA Wireless Link, BRAVIA Input Link, and BRAVIA DVD Link.

VE5-SERIES

The BRAVIA VE5-series offers substantial power savings thanks to a zero-watt standby power switch, along with motion and light sensors that minimize energy usage without compromising performance. They also incorporate Sony's exclusive micro-tubular Hot Cathode Fluorescent Lamp

(HCFL). The technology helps reduce power consumption by almost 40% compared to Sony's other LCD HDTV models.

- Many times people become busy and forget to turn the television off when they leave the room. Sony's Presence Sensor feature solves the issue by automatically turning off the picture when no one is present in the vicinity after a user-set timeframe. When the sensor detects motion, the TV turns it self back on instantly.
- They offer a zero-watt standby Energy Saving Switch. When not in use, the standby switch can also be manually turned off, cutting power to nearly zero watts. Simply flip the switch back on and the TV is fully operational.
- Light sensor will automatically adjust the backlight depending on ambient room light. The setting saves energy and improves image contrast by lowering the backlight when it is set unnecessarily high in dimmer room light.
- Compatible with Sony's BRAVIA Link modules including the BRAVIA Wireless Link, BRAVIA Input Link and BRAVIA DVD Link.
- They also feature BRAVIA Engine™ 2, BRAVIA Sync, 24p True Cinema, 4 HDMI inputs, Single PC, component, composite and S-video inputs, Favorites menu

W-SERIES

The W-Series steps-up with net-working capability to deliver the same interactive functionality as the top-of-the-line BRAVIA Z and XBR9 series. An economical HDTV option, the W-Series feature full HD 1920 x 1080 progressive (1080p) resolution, Motionflow™ 120Hz technology for improved sharpness and detail in fast-moving images, and Sony's BRAVIA Engine 3, which delivers a crystal clear picture even if the content isn't perfect.

- Ethernet connection allows direct access Sony to BRAVIA Internet Video content using an existing broadband connection. The service offers one of the largest selections of free and premium movies, TV shows, sports, music and more from an array of partners like Amazon Video On Demand, YouTube, Yahoo!, Sony Pictures, Sony Music and many others.
- BRAVIA Internet Widgets, provided by the Yahoo! Widget Engine, expand and personalize the experience by allowing you to interact with your favorite Internet content like Yahoo News, Video, Finance, and Flickr while watching TV shows. Track your favorite sports team, check your stocks, and share photos with friends and family as you watch television.
- Digital Living Network Alliance (DLNA®) compliant, enables easy access to digital photos, music and video stored on a PC or other DLNA server using the XMB® interface and the TV's remote control.
- USB input for displaying digital photos or playing digital video and audio files from compatible USB storage devices.
- 24p True Cinema, XrossMediaBar (XMB) with enhanced 3D favorites menu, Internet powered TV Guide Onscreen, BRAVIA Sync and BRAVIA Link compatibility, and 4 HDMI inputs

Z-SERIES • XBR9 SERIES

The Z-Series and XBR9 Series are Sony's full HD 1920 x 1080 progressive (1080p) televisions, but also include Motionflow™ 240Hz technology, which delivers exceptionally crisp and detailed images with natural motion. The Motionflow algorithm goes beyond traditional 120Hz technology by quadrupling the frame rate of conven-

tional LCD TVs and interpolating three new frames. They also offer a host of inputs including PC, component, composite and S-Video.

The XBR9 Series steps up with a wide color gamut cold cathode fluorescent light (WCG-CCFL) backlight that provides a broader color palette. The result is on-screen images with more vibrant, "life-like" colors.

TeleDock LCD TELEVISIONS

2nd Generation LCD TVs with Integrated iPod Dock

Available in 32-, 42- and 46-inch sizes, JVC's P-Series TeleDock LCD TVs are full HD (1920 x 1080) displays with digital noise reduction, dynamic backlight and 1080 24p/30p output. They include a flip-down iPod dock at the base of the set, providing a direct connection for playback through the TV. Video files, music files and photos stored on an iPod can be played and shown on the TV. The docked iPod can be controlled from the TV's remote, which includes a circular keypad with a control scheme that mimics the iPod's control wheel. In addition, the iPod charges while docked whether the TV's power is on or off. They feature a gloss black finish including the base and blue (P300) or white (P500) light "diffuser" front illumination. The diffuser distributes the light across the bottom panel of the sets. The illumination is dimmable and defeatable in the menu.

- Each includes a universal remote with direct input access, a side-mounted USB photo viewer, and ATSC/QAM tuning.
- Sound system delivers 10 watts per channel to a pair of JVC's exclusive oblique cone speakers.
- Connections include three HDMI inputs, two component inputs, two S-video inputs, PC input (D-sub) and an analog video output.

iPod Dock Features:

- Comprehensive iPod-like menu allows selection of music or video playback and also supports music search. During video playback, low resolution files, such as internet videos, can be displayed in a small screen mode. Higher resolution video can be shown in nine aspect modes at full screen.
- During music playback, song title, artist, album and genre are all displayed on the TV screen. During video playback, pushing the Display button will display on-screen the video title.
- With a PC connected, iTunes can be displayed on the TV and synched with the docked iPod.
- When a connected PC is powered up, the PC will automatically power-up the television
- Music stored on the iPod can be played through the TV while watching TV programming, and the TV program or other video source can be changed while the music is playing; in addition, the sound can be swapped between the iPod and the TV program sound.
- With music playing from the iPod, photos stored on the iPod or photos stored on an external device connected to the set's USB port can be viewed on the TV.

TOSHIBA

AV600 SERIES (720p)

LCD HDTV

These small HDTVs pack a powerful punch. Available in 19- and 22-inch, these sets are offered in a high-gloss black cosmetic design, and are a great choice for consumers looking to replace old analog sets. They feature DynaLight™ dynamic backlight control for deeper black levels and two HDMI digital inputs for simple high quality connection to cable/satellite boxes, DVD players and more. 10-bit video processor and CineSpeed Display enhances action sequences, sports or video games with a wide viewing angle for a good seat anywhere in the room. They also include a PC input for use as a computer monitor or gaming TV, and unlike other smaller TVs they also feature Gaming Mode to shorten the signal to screen time for faster game controller response.

- Three user-selectable color temperature settings allow viewers to adjust white balance to achieve the best television picture possible in any viewing environment, or they can simply adjust the picture to suit their personal tastes.
- Cinespeed™ LCD panel has 8ms or less response speed necessary for cleaner high-action home theater images. A wide viewing angle ensures that you'll have the best seat in the house.
- Hidden thin-line speakers to provide realistic sound with enhanced dynamic range.
- Conveniences include sleep timer, Auto Aspect Control, Gaming Mode, Channel Browser, Channel Labeling, Input Labeling
- Input/outputs include two HDMI, two ColorStream® HD Component video inputs, one front and one rear A/V input and rear S-Video input. There is also the 15-Pin D-Sub PC Input, an Analog Audio Out (Variable) and Dolby® Digital Optical output.

19AV600U (B&H# TO19AV600U): 19"**299.95** **22AV600U** (B&H# TO22AV600U): 22"**399.95**

RV525 SERIES (1080p) LCD HDTV

The RV525 Series step you up to 1080p Full HD. With twice the pixel resolution of 720p HD models, Full HD creates the pinnacle in picture quality. They have 3 HDMI digital inputs with REGZA-LINK® (HDMI CEC) and a high-resolution (S-XGA, 15 pin, D-sub) PC Input. They also add QSound® for enhanced audio quality.

- QSound® is a 3D sound processing algorithm that creates 3D audio effects from multiple monophonic sources and sums the outputs to two channels for presentation over regular stereo speakers.
- Lip-Sync Latency activates an audio/video display timing adjustment function that allows HDMI source devices to accurately perform synchronization automatically.

40RV525U (B&H# TO40RV525U): 40"**795.00** **46RV525U** (B&H# TO46RV525U): 46"**1149.95**

REGZA LINE

The REGZA line is powered by Toshiba's PixelPure 5G 14-Bit internal digital video processing, the heart of the REGZA engine. All REGZA models also include Resolution+ super resolution technology, the soul of the REGZA engine, to upconvert and enhance 480i/480p and even 720p signals to create increased detail so everything will feel like HD.

The REGZA XV645 series (40", 46", 52") include ClearFrame 120Hz technology for clear fast motion video, as well as AutoView, which automatically sets picture settings based on the incoming video signal and ambient room light. They include three HDMI digital inputs with enhanced REGZA-LINK (HDMI-CEC) and a high-res PC input. They feature Toshiba's Bottom Deep Lagoon design with invisible speakers. Inspired by nature, this design provides a three dimensional feeling to a clean, flat design.

40XV645U (B&H# TO40XV645U): 40"**999.95** **46XV645U** (B&H# TO46XV645U): 46"**1399.95**
52XV645U (B&H# TO52XV645U): 52"**1799.95**

The REGZA ZV650 Series (42", 47", 55") steps-up with ClearScan 240, which combines a 120Hz frame rate with new Backlight Scanning Technology to create a 240Hz effect for an all new level of picture clarity with fast motion video. For improved sound, the ZV650 series also adds Dolby Volume, which eliminates annoying, inconsistent volume levels from commercials or when changing channels. Connectivity is also taken to an all new level with four HDMI digital inputs that have enhanced REGZA-LINK (HDMI-CEC), and InstaPort™ for faster HDMI switching. To allow playback of downloaded content, they also have a USB Port allowing users to view their JPEG pictures, MPEG-1/2 or DivX® videos and listen to MP3 audio. An SD card slot allows easy viewing of JPEG digital pictures by simply taking the memory card from the camera and placing it in the TV.

42ZV650U (B&H# TO42ZV650U): 42"**1299.95** **47ZV650U** (B&H# TO47ZV650U): 47"**1699.95**
55ZV650U (B&H# TO55ZV650U): 55"**2399.95**

The state-of-the-art REGZA SV670 Series (46", 55") add FocalLight LED Backlight with Local Dimming. Unlike simple edge LED, FocalLight offers a full LED matrix for enhanced brightness uniformity. Even more important is the local dimming, which creates significantly higher dynamic contrast, as blacks are blacker without reducing the peak white brightness. The ultimate in cosmetic design, this series features Toshiba's Deep Lagoon process behind the new Infinity Flush Front. Inspired by an infinity pool, this design uses a solid sheet of anti-reflective glass across the entire front of the TV.

46SV670U (B&H# TO46SV670U): 46"**2299.95** **55SV670U** (B&H# TO55SV670U): 55**2999.95**

MULTI-SYSTEM TV SETS

Almost everyone shopping for a TV set for use in the United States should skip this page, since you'll find equipment dedicated to the American NTSC (analog) and ATSC (digital) video systems elsewhere in the catalog. If, however, you're looking for a TV that is NTSC-compatible and can be also used with most types of the PAL or SECAM systems employed in other parts of the world, then you may want a multi-system set.

HARMONY 1000 Home Theater Remote Control

- Controls up to 15 components • 3.5" color touch screen
- One-touch activity-based control
- Customizable Color Icons
- Full HDTV control including aspect ratios and sound modes.
- No complicated macros to program
- Easy Computer-based set-up
- Supports 5,000+ brands & 175,000+ devices,
- Rechargeable battery with handy charging base
- Optional Harmony RF Wireless Extender • Mac and PC Compatible

#HAH1000 \$499.00

**HARMONY ONE**

Universal Remote Control

- Replaces up to 15 remotes
- Full-color, activity-based, touch screen (ex. Watch Movie or Listen to CD)
- Rechargeable design
- Online database supports more than 225,000 devices from more than 5,000 brands
- PC and Mac compatible
- Sculpted, backlit buttons in logical zones
- Ergonomic design: Fits comfortably in your hand

#HAHARMONY1 \$219.00

**HARMONY 890**

Home Theater Remote Control

- Uses both radio frequency (RF) and infrared (IR) wireless
- Range of up to 100 feet Colorful icon-based LCD Screen • 8 on-screen activity buttons Easy command of A/V and household equipment that may be out of range for common infrared remotes
- Integrate up to 15 devices • Advanced setup wizard online via computer • Logitech's patented Smart State Technology programs your system
- Rechargeable lithium-ion battery charging station

#HAH890 \$299.00

**HARMONY RF WIRELESS EXTENDER**

RF for 890 and 1000 Remote Controls

Easy to install RF extender guarantees virtually interference-free operation in multi-room configurations or remote environments.

- No line-of-sight needed: Control just about all the components you can fit into one cabinet • Just Plug It In: Close the door, and you're synchronized with your Harmony remote • Free Support • 100-foot range: ideal for large media room installation.
- AC adapter (attached), USB cable, 4 x dual IR emitters
- Windows® 2000, XP, Windows Vista
- Macintosh® OS X 10.3 or later

#HAWRF2 \$99.99

**HARMONY 550**

Home Theater Remote Control

- Control up to 12 devices • Program through Logitech's on-line database
- 3,000 manufacturer codes and 100,000 IR devices codes available
- One-Touch Control: Choose the activity you want to do, not the device (component) you want to turn on. • Customizable Buttons: Put your most frequent activities at your fingertips. • Sound and Picture Buttons: Configure your preferences with just one button • Learning Port: Add favorite functions from an old remote just by pointing it at your Harmony
- Fully Backlit Controls and LCD screen: Navigate even in movie-theater darkness

#HAH550 \$99.00

PowerBlaster MRF-100B

- RF Extender Kit f/Universal Remote
- For use with MasterControl RF10 / RF20 / RF30 (Optional)
- Hide components
- Picks up RF signals through walls, doors, floors – indoors & outdoors from up to 100' away

#UNMRF100B \$59.99

PowerPak

Including MasterControl RF20 and the PowerBlaster MRF-100B. Revolutionizes the way a remote works. Finally, "Barrier-free" RF Control for consumers in a convenient bundle package

#UNRFS200PP \$129.99

R6 / R7

Home Theater Remotes

- Controls 6 Components • With MacroPower, you can program the R6 to turn up to 6 components ON or OFF with the press of one button. • Pre-Programmed Codes – database of thousands of pre-programmed codes • Learning Capable – 'learns' functions from other remotes
- SimpleSound™ feature gives you total volume control over all the components in your system. • Macro Capabilities: 6 macro buttons (up to 20 steps each)
- SimpleSound – gives you total volume control over all the components in your system, even those without their own volume control, such as TiVo, DVD and VCR.
- Retains programming w/out batteries, for 10 years
- Batteries: 2 AA's (included) • IR Range (Infrared): 30–50 feet

#UNR6 \$19.99

Step-up features of the R7:

- Controls seven components

#UNR7 \$29.99

MSC-400 / MRF-350

Master System Controller / Base Receiver

- Controls a wide range of disparate devices including IR (infrared), RS-232 (serial), Relay (contact/voltage triggered) and even USB Keyboard commands (Supports up to 32,640 macros)
- Comes complete with one RFX-250 digital RF receiver (50-100' Range)
- Triggered by digital RF (Radio Frequency) from an MX-900, TX-1000, MX-950 or MX-3000 remote control

#UNMSC400 \$599.95

MRF-350 RF Base Station Receiver

- Compatible with MX-3000, MX-950, MX-900 and MX-350 remote controls. Includes base station and RFX-250 RF sensor. Receives IR Signal enabling relocation of RFX-250 to low interference or concealed area. (6 Addressable IR Line Outputs)

#UNMRF350 \$249.00

MRF-260

RF Expander for Universal Remote Controls

The MRF-260 is a compact, fully addressable RF base station compatible with URC's, many Narrow Band-equipped remote controls. The base station features an integrated Narrow Band receiver and antenna, two fixed line outputs for IR emitters, and two adjustable, or variable, line outputs that can be matched to any IR equipped component

- Eliminates the need for line-of-sight pointing at components. Signal is sent to Component via the Remote Front Blaster or 6 supplied flashers.
- Individually addressable flasher ports can control up to 4 identical devices separately
- 2.5 MM mini jack plugs
- Up to 15 addresses per unit, AC adapter included
- Warranty: 1 year, parts and labor

#UNMRF260 \$149.95

MX Series Controllers can only be purchased in the B&H Superstore

COMPLETE CONTROL MX-3000

IR/RF Color Touch Screen Remote

- 3.5" screen, 65,535 Colors • Fluid page transitions & animated macros • You can place BMP's, JPEG's, PNG's, animated GIF's on any button • Controls up to 20 devices • Macros can set up to 255 custom device variables.
- One-touch transmission via the MX-3000 quickly transmits even long macros to the MRF-250 RF/MRF-300 RF Base Station (sold separately) • Add talking help buttons (recorded on any PC with a microphone) or music to your macros via any WAV file. • Lithium-Ion Rechargeable Battery (included)
- Automatic Backlighting via Motion Sensor • Weight: 8 oz (with Batteries)
- Range: IR (line of sight) - 30-40', RF - 50-100' (w/MRF 250/350)

#UNMX3000 \$999.00

COMPLETE CONTROL MX-900

IR/RF Remote Control

- Radio Frequency (RF) operation up to 100' (w/ optional MRF-250 or MRF-300 RF Base stations)

IR control up to 50' Bright easy-to-read LCD screen w/ six hard Activity buttons

- Controls Up To 40 Components with up to 40 pages per device. Allows custom interfaces to be created for every room and every user, complete with automated favorite channels and stations.
- "Watch and Listen" Activity Based Macros

#UNMX900 \$449.00

COMPLETE CONTROL MX-350 OSIRIS

IR/RF Remote Control

Radio Frequency (RF) operation up to 100' range through walls, indoors or outdoors. (with optional MRF-250 or MRF-300 RF Base stations) Controls Up To 20 Components which can be programmed with up to 8 pages of LCD screens, plus the 33 hard buttons. Up to 912 potential Macro buttons, each programmable up to 190 functions.

- Controls Up To 20 Components
- 50 Favorite Channels Programming
- The MX Editor software with over 1,500 code of Brands/Models in addition to "Learning Remote" Capability

AVS-2000 VOLTAGE STABILIZER**MONSTER POWER**

A built-in, servo-controlled, variable-voltage transformer maintains a 120V supply to your audio/visual system, stabilizing wildly varying power supplies. Multiple protective features such as automatic shutdown, sequential startup, and clear digital displays provide extra security for your home theater system.

A consistent, servo-controlled variable voltage transformer maintains a 120V output from input voltages between 80-140V, for optimal home theater performance.

PLV-Z3000

Ultra-High Contrast Full HD 1080p LCD Front Projector

A super-fast 120Hz Full HD 1080p LCD Projector that features SANYO's exclusive 3D color management system, an ultra-high contrast ratio of 65,000:1, an advanced lens shifting function and a quiet fan system. The PLV-Z3000 is also the industry's first LCD projector to introduce 5:5 pull down, for the most frame accurate delivery of all source material. Outfitted with the most advanced lens shifting function, and coupled with the projector's short throw capability and 2x zoom, creates a large screen image in any size room and from virtually any location. The lens shifting function allows wide-range vertical shifting to three screen sizes and horizontal shifting to two screen sizes. The design is capable of projecting a 100-inch diagonal image from 10 to 20 feet away.

SANYO

BRAVIA VPL-HW10

1080p Home Theater Projector

Designed for those looking for the ultimate home theater viewing experience, the Sony VPL-HW10 is a 1920 x 1080 progressive Silicon X-tal Reflective Display (SXRD) projector featuring 30,000:1 dynamic contrast ratio, 1000 ANSI lumens for brighter room applications, and 24p True Cinema technology for film-like performance. It is equipped with unique algorithms for noise reduction and color enhancement to deliver incredibly sharp, vibrant images. There are also two HDMI inputs with x.v.Color technology, which are perfect for getting brilliant results from your compatible HD camcorder. For custom installations, the projector is equipped with a panel alignment adjustment function that aligns each red, green and blue pixel for precise images.
